

MANTHAN M Y

Java Full Stack Developer

Mandya, Karnataka, India | +91 9743981243 | manthanmym@gmail.com

[LinkedIn](#) | [GitHub](#)

Professional Summary

Java Full Stack Developer with hands-on experience building CRUD-driven, database-backed applications using Core Java, JDBC, MySQL, HTML5, and CSS3. Currently developing production features as a Java Development Intern at Dhee Coding Lab, applying Object-Oriented Programming, REST APIs, and normalized database design. Strong foundation in Data Structures, Algorithms, DBMS, and Operating Systems, with additional exposure to AI/ML and Generative AI tooling. Seeking a Full Stack Developer role to build scalable, reliable backend and web applications.

Technical Skills

- **Languages:** Java, SQL, Python
- **Core Java:** Object-Oriented Programming (OOP), Exception Handling, Multithreading, JDBC
- **Backend:** Servlets, JSP, Database Connectivity, CRUD Operations
- **Frontend:** HTML5, CSS3,
- **Database:** MySQL
- **Tools & Platforms:** GitHub, Eclipse, VS Code
- **Core CS Fundamentals:** Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks
- **Emerging Tech:** Artificial Intelligence, Machine Learning, Generative AI

Experience

Java Development Intern

Present

Dhee Coding Lab, Bengaluru

- Developing Java applications using Core Java, JDBC, and MySQL to support end-to-end backend functionality
- Implementing CRUD operations and database connectivity layers, ensuring reliable data persistence and retrieval
- Building responsive, cross-browser web pages using HTML5 and CSS3 for internal application interfaces
- Applying Object-Oriented Programming principles and systematic debugging to improve application stability and code quality

Projects

Payroll Plus CLI | Java, JDBC, MySQL

2026

- Developed a command-line payroll management system to handle employee records for a simulated organization
- Implemented full CRUD operations using JDBC and MySQL, ensuring accurate and consistent data storage
- Automated salary calculation and employee data management, reducing manual processing steps

Student Management System | Java, JDBC, MySQL

2026

- Developed a database-driven application to manage student records with real-time data updates
- Implemented Create, Read, Update, and Delete (CRUD) operations using JDBC for reliable record management
- Designed a normalized MySQL database schema to eliminate redundancy and improve query efficiency

Product Recommendation Engine | Python, Machine Learning

2026

- Built a recommendation engine using clustering and similarity-based algorithms to generate personalized suggestions
- Generated recommendations based on customer behavior analysis, improving relevance for end users
- Improved recommendation accuracy through customer segmentation techniques

Education

Bachelor of Engineering in Computer Science and Engineering

2022 – 2026

Cauvery Institute of Technology, Mandya (VTU) | CGPA: 8.91 / 10

Certifications

- NVIDIA – Building LLM Applications with Prompt Engineering
- Google – Build Real-World Applications with Gemini and Imagen
- Google – Prompt Design in Vertex AI
- Microsoft & LinkedIn – Career Essentials in Generative AI

Achievements

- Winner, Inter-College Technical Quiz Competition
- Winner, Technical Quiz Competition, GSSS
