

MANTHAN M Y

AI ML Engineer |

Mandya, Karnataka, India | +91 9743981243 | manthanmym@gmail.com

[LinkedIn](#) | [GitHub](#)

Professional Summary

Computer Science Engineering student specializing in Machine Learning and Data Analytics, with hands-on experience building predictive models that achieved up to 92% accuracy and recommendation systems with 85% relevance. Skilled in the full ML lifecycle — data preprocessing, model development, evaluation, and deployment — using Python, Scikit-Learn, and cloud tools. Seeking to apply proven analytical and engineering skills to deliver measurable, scalable AI solutions.

Technical Skills

- **Machine Learning & Data Science:** Python, Scikit-Learn, Pandas, NumPy, Predictive Modeling, CNN, Classification, Clustering, Cross-Validation, Feature Engineering
- **Visualization & Deployment:** Streamlit, Plotly, Matplotlib, REST APIs, Model Deployment
- **Programming & Databases:** Python, Java, MySQL, Data Structures & Algorithms, Object-Oriented Programming, DBMS
- **Tools & Platforms:** GitHub, Google Cloud Storage, VS Code, Eclipse, Ngrok

Experience

AI/ML Intern

2025

Global Next Consulting India Pvt. Ltd.

- Engineered and optimized machine learning models on structured datasets, improving prediction accuracy to 92% through targeted feature engineering and data preprocessing
- Built end-to-end evaluation pipelines using Accuracy, Precision, Recall, and F1-Score to benchmark and validate model performance
- Owned the complete ML lifecycle from data cleaning and exploratory analysis through model validation and reporting
- Collaborated with senior data scientists to translate business requirements into measurable modeling objectives

Projects

Customer Segmentation and Recommendation Engine | Python, Scikit-Learn, Streamlit, Plotly

2026

- Applied K-Means clustering with elbow-method optimization to segment customers into actionable behavioral groups
- Built a cosine similarity-based recommendation engine achieving approximately 85% relevance on test queries
- Designed and deployed an interactive Streamlit dashboard for real-time analytics visualization

Natural Disaster Prediction and Management System | Python, Machine Learning

2025

- Developed predictive models using environmental and historical datasets to forecast disaster risk
- Implemented data preprocessing pipelines that improved prediction reliability and reduced noise in input features
- Designed an analytics-driven alert framework to support early-warning disaster response

Predictive Analytics for Synthetic Healthcare Data | Python, Scikit-Learn, Ngrok

2025

- Built healthcare outcome prediction models achieving approximately 88% accuracy on synthetic patient data
- Conducted exploratory data analysis and feature optimization to improve model signal quality
- Improved model performance through systematic hyperparameter tuning and cross-validation

Education

Bachelor of Engineering in Computer Science and Engineering

2022 – 2026

Cauvery Institute of Technology, Mandya | CGPA: 8.91 / 10

Certifications

- NVIDIA – Building LLM Applications with Prompt Engineering
- Google – Build Real-World Applications with Gemini and Imagen
- Google – Prompt Design in Vertex AI
- Microsoft & LinkedIn – Career Essentials in Generative AI

Achievements

- Winner, Inter-College Technical Quiz Competition (Team Lead)
- Winner, Technical Quiz Competition, GSSS
